City of Houston. June 3d 1837

Whitet 9 acted as Col of Cavalry

In August 1837, I encamped on the San Antonio river with the Texian Cavalry and made use of, and destroyed by grazing my Cavalry horses all the corn at the different Ranches on the west side of the river from La Bahia to 15 miles below that point — said corn was used for the Public service and the fields would average from 30 to 35 bushels of corn per acre —
