To raise the means with which I have operated, I have already explained in my report that I was obliged to sell a large portion of my best property on credit, and afterwards to negociate the greater part of the notes at discount in order to realize the cash. The following is a statement of the losses upon those notes, not elsewhere explained:

I sold one note of $1250 for $1100: loss	$150
I sold one note of $605 payable in four months at a discount of 5 pr. cent. per mo: loss	121
I negociated notes amounting to $12500 payable at different periods making an average of eight months upon the whole, at a discount of 3 pr. cent. per mo: loss	3000
I exchanged $700 of Mississippi money at a discount of 5 per cent: loss	35
	$3306.

I have set down this as a debit in my a/c. merely to show the difficulties I have had to overcome, and the losses I have sustained in my operations under my commission. The government will act in the matter as it may deem just.
