The first part of the paper is devoted to a discussion of the  
 general principles of the theory of the structure of the  
 crystal lattice. It is shown that the structure of the  
 lattice is determined by the relative positions of the  
 atoms in the lattice. The structure of the lattice is  
 determined by the relative positions of the atoms in the  
 lattice. The structure of the lattice is determined by the  
 relative positions of the atoms in the lattice. The  
 structure of the lattice is determined by the relative  
 positions of the atoms in the lattice. The structure of  
 the lattice is determined by the relative positions of  
 the atoms in the lattice. The structure of the lattice  
 is determined by the relative positions of the atoms  
 in the lattice. The structure of the lattice is  
 determined by the relative positions of the atoms in  
 the lattice. The structure of the lattice is determined  
 by the relative positions of the atoms in the lattice.
