Believing it my duty not to receive & correct the Certificate of an officer, when I know that Certificate does not state the facts correctly as they transpired, I am compelled to reject the account of Jacob Grove founded on the Certificate of Capt Frailey.

Capt Frailey's Company did not arrive in Texas until after the middle of August 1836, to my knowledge — his certificate states that Jacob Grove enlisted under his command on the 3 day of June 1836, at what place he does not state, but I presume it must have been in the United States, if so, he should have stated the fact and also on what day he was mustered into service in Texas. The law says "that volunteers from the United States shall be paid from the time of leaving their homes provided that time shall not exceed sixty days before they are mustered into service in Texas, and their term of service shall commence
